DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by BISHNER 2,555,630.

Regarding claims 1, 2.

BISHNER discloses a housing defining an interior space, said housing having a top wall; an outlet positioned on said top wall of said housing, said outlet being adapted for coupling with conventional electrical plugs; an energy storage assembly positioned within said housing, said energy storage assembly being electrically coupled to said outlet, said energy storage assembly supplying electrical energy to said outlet (see figure 1). The said housing being self contained including storage device and inverter to generate ac thus having the means to be portable.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/764,366

Art Unit: 2836

Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over GRIFFEY 6,577,098 in view of FUJII 5,616,968.

Regarding claims 1, 2, 8.

GRIFFEY discloses a portable ac power system comprising a portable housing defining an interior space, said portable housing having a top wall; an outlet positioned on side wall of said housing said outlet being adapted for coupling with conventional electrical plugs; an energy storage assembly being electrically coupled to said outlet, said energy storage assembly supplying electrical energy to said outlet.

GRIFFEY does not disclose the energy storage device positioned within the housing.

FUJII teaches an expandable ac power device wherein the energy storage assembly is positioned within the power supply device.

It would have been obvious to one having ordinary skill in the art at the time of this invention to have modified the portable power supply to position the energy storage assemble within the housing when a smaller battery is suitable to reduce size.

Regarding claim 3.

GRIFFY in view of FUJII disclose the system of claim 1.

FUJII discloses recharging said energy storage assembly when said energy storage assembly is not in use.

Regarding claim 4.

GRIFFY in view of FUJII disclose the system of claim 3.

Application/Control Number: 10/764,366

Art Unit: 2836

FUJII discloses a recharging assembly within a case and electrical cord assembly for the charger for recharging the energy storage assembly.

Regarding claim 5.

GRIFFY in view of FUJII disclose the system of claim 4.

GRIFFEY teaches a handle member to facilitate transport of said system.

Regarding claim 6.

GRIFFEY in view of FUJII disclose the system of claim 4 further comprising indicators (LED indicator 42).

Regarding claims 9, 10, 11, 12.

GRIFFEY in view of FUJII disclose the system of claim 8.

GRIFFEY in view of FUJII does not teach a pair of charge indicators.

GRIFFEY teaches a charge indicator.

It would have been obvious to one of ordinary skill in the art to modify the system of claim 8 to have more than one indicators to indicate charge if more than one storage device where used. This would be a mere duplication of parts.

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over GRIFFEY 6,577,098 in view of FUJII 5,616,968 in further view of KELLY 6,268,077.

Regarding claim 7.

GRIFFY in view of FUJII disclose the system of claim 4.

GRIFFY in view of FUJII does not disclose an energy storage device selected from a group of energy storage devices consisting of battery, capacitor, and fuel cell.

Art Unit: 2836

KELLY teaches energy storage devices consisting of battery, capacitor, and fuel cell.

It would have been obvious to one having ordinary skill in the art at the time of this invention to modify the storage assemble of the mobile ac power supply to select an energy storage device or devices to best satisfy the system capability requirements.

Any inquiry concerning this communication should be directed to Robert L.

DeBeradinis whose number is (571) 272-2049. The Examiner can normally be reached Monday-Friday from 8:30 am to 5:00 pm.

If attempts to reach the Examiner by telephone are unsuccessful, the Examiner's supervisor, Brian Sircus, can be reached on (571) 272-2058. The Fax phone number for this Group is (703) 872-9306.
